Office Action Summary	Application No. 10/694,521	Applicant(s) ROUNDY ET AL.	
	Examiner Marcus R. Smith	Art Unit 2619	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 September 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US patent No. 6,940,847 B1 (Glitho et al.).

Regarding claims 1, 5 and 9, Douglas et al. teaches a method for processing incoming calls according to at least the protocol using finite state machine in integrate telecommunication systems comprising of

receiving at least first and second incoming calls (call request 514 and 516),
retaining the first incoming call in a first state (call setup state, 1st call),

waiting (506 pending) until the first incoming call progresses to a second state
(Call connection state, 1st call),

answering the second incoming call (call processing state, 2nd cal) and placing it
in the first state after the first incoming call progresses to the second state (Call
completed state, 1st call), and

transitioning the second incoming call in the first state to a second state (Call completed state, 2nd call) (See Fig. 4, Col. 14, line 60 to Col. 15, line 6).

Regarding claims 2, 6 and 10, Glitho et al. further teaches that the first state is a pending answer (call setup for connection) state and the second state is a call connected state (See Fig. 4, Col. 14, line 60 to Col. 15, line 6).

Regarding claims 3,7 and 11, Glitho et al. further teaches that starting a timer when placing the second incoming call in the first state (waiting for timeout) and hanging up the second incoming call and placing it in a third state if the timer expires (call abandoned or completed at timeout) (See Fig. 4, Col. 16, lines 3-23).

Regarding claims 4, 8 and 12 Glitho et al. further teaches that waiting until the first incoming call progresses to a third state (call abandoned or completed) and answering the second incoming call and placing it in the first state (setup process) if the first incoming call progresses to the third state (See Fig. 4, Col. 14, line 60 to Col. 16, line 23).

Response to Arguments

Applicant's arguments filed 9/27/07 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., handling simultaneous calls) are not recited in the rejected claim(s). Although the

claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
